ORSystem

Campus Event Budget Allocation System

Linear Programming Decision Support System

LoginRegister

Project Overview

ORSystem is a web-based Linear Programming Decision Support System developed using PHP and MySQL.

This system helps student clubs allocate their total budget to different activities such as catering, marketing, and equipment.

The purpose of this system is to help student clubs make better budget allocation decisions while reaching the highest number of students.

Users can enter:

- Decision variables
- Objective function
- Budget constraints
- Optimization type: Maximize or Minimize

The system will generate the optimal solution and display the best objective value.

System Features

Input LP Model

Enter objective function and constraints.

Optimization

Generate optimal solution automatically.

Database Storage

Store and retrieve LP problem data.

Result Display

Display decision variables and objective value.

Group Members

No.	Name	Matric Number
1	LIM XIN YI	2240250
2	NURUL HIDAYAH BINTI FARAN	2240251
3	AHMAD THAQIF BIN BADRUL HISYAM	2240231
4	CHENG EE HINN	2240233

Dashboard Page

Input Page

Campus Event Budget Allocation Input

Simple Explanation:
Activity 1 = X, Activity 2 = Y. The system will decide the best quantity for both activities.

Event / Project Title

Example: Campus Sports Day Budget Allocation

Activity Benefit
Enter how many students can benefit from one unit of each activity.

Activity 1 Benefit Score

Example: 50

Example: Catering benefits 50 students.

Activity 2 Benefit Score

Example: 38

Example: Marketing benefits 38 students.

Budget Constraint
Enter the cost per unit for each activity and the total available budget.

Activity 1 Cost Per Unit (RM)

Example: 100

Activity 2 Cost Per Unit (RM)

Example: 80

Total Budget Available (RM)

Example: 1000

Volunteer / Time Constraint
Enter the volunteer hours needed and total volunteer hours available.

Activity 1 Volunteer Hours

Example: 2

Activity 2 Volunteer Hours

Example: 3

Total Volunteer Hours

Example: 40

Activity Limit
Enter the maximum total number of activities that can be organized.

Activity 1 Count

1

Activity 2 Count

1

Maximum Total Activities

Example: 20

Recommended Budget Allocation Result

Project: Campus Event Budget Allocation Demo

Campus Event Budget Allocation System

Recommended Activities

Activity	Recommended Quantity	Benefit Per Unit	Total Benefit
Activity 1	10	50	500
Activity 2	0	38	0

Maximum Total Benefit: 500

Resource Usage Summary

Resource	Available	Used	Remaining
Budget (RM)	1000	1,000.00	0.00
Volunteer Hours	38	20.00	18.00

System Interpretation

The system recommends choosing **10** unit(s) of Activity 1 and **0** unit(s) of Activity 2 because this combination gives the highest total benefit without exceeding the available budget, volunteer hours, and activity limit.
